500

service kits available

Our **service kits** leave nothing to chance so your customers can **run smoothly**

Service kits from Danfoss Power Solutions

Just like you, we're always looking for ways to improve efficiency and reduce costs. To help you achieve this, we're introducing a range of service kits that make it possible to do just that.

Our service kits feature ALL parts required to complete a fast and efficient service process. Of course, you can count on guaranteed Danfoss quality and traceability.

You can reduce costs through quicker first-time repairs and a smarter approach to your inventory. Don't forget that the Danfoss service team is ready with technical advice to get the job done.

Reduce service times and costs when offering or performing service schedules, and keep your equipment running smoothly.

Danfoss Service Kits

Our **Modular Service Kits** provide all that you will need to complete the planned service breakdown, including control service and overhaul kits for each frame size. The component kits enable you to replace a group of parts within the unit, improving productivity — saving you and your customers time and money. You receive only the components you need with exploded views. Our extensive range of kits include:

Service and overhaul kits for all seals, gaskets, and o-rings, such as:

- Series 90 PV, 42-250cc
- Series 90 MF, 42-130cc
- M35/44
- M46 PV
- Series 20, 51-334cc
- Series 51, 60-250cc
- Series 45, 25-147cc
- LV/KV Motors, 25-45cc
- H1 Pumps, 45-210cc

Component kits for internal replacement parts, such as:

- Piston kits
- Cylinder block kits
- Auxiliary mounting kits
- Swashplate kits
- Control kits
- Valve kits
