

Training Material

PLUS+1[®] GUIDE Fundamentals

Instructor-led hands-on training

The PLUS+1[®] GUIDE Fundamentals training is intended for engineers and product managers with practical experience who need to understand, evaluate or use the PLUS+1[®] GUIDE technology.

- Introduction to components and functions
- Set up a new project
- Program small applications
- Learn the flow of data from input to output
- Create a basic diagnostic tool application
- CAN communication in PLUS+1[®] GUIDE
- Display programming
- CAN trace with CANKing

On completion of the training course participants will be able to write, compile and run a simple application, as well as getting to know the basics of the programming environment.
